

Someone said: "Cricova does not belong only to its inhabitants!"

This statement corresponds to a large extent, to the truth. Probably there is no man in Moldova, which have not seen or even heard about Cricova town with its famous stone quarries and the famous underground storage of wines.

Cricova, which is often called "The Cellar of Moldova", became one of the most prestigious landmarks of our motherland. Several delegations, guests and tourists visit our town. Therefore, who was in Moldova and did not visit Cricova - he actually did not see Moldova. Besides the famous underground cellars today Cricova can be proud of a number of enterprises and institutions with distinguished names. Cricova's special pride is, at first, the people who live and work here.

Our motto was and continues to be: "It is good in the whole country, but it is better in Cricova!"

We invite you to visit us and to convince yourselves.

The Mayor of Cricova Town

Valentin Gutan
